ELECTRICIAN APPRENTICESHIP | FOUR-YEAR PATHWAY

# Tuition & funding overview

$4,500 per year. Four years of structured learning. A clear investment in your electrical career.

**Annual tuition: $4,500**
Program length: four years
**Total published tuition: $18,000**
Tuition is separate from wages earned through an employing sponsor.

## Four-year tuition schedule

| Program year | Annual tuition | Cumulative tuition |
|---|---|---|
| Year 1 | $4,500 | $4,500 |
| Year 2 | $4,500 | $9,000 |
| Year 3 | $4,500 | $13,500 |
| Year 4 | $4,500 | $18,000 |

### Understand the full cost before enrolling

The enrollment agreement must identify required books, digital platform access, lab materials, tools/PPE, testing, licensing and any additional fees, and say whether each is included in the $4,500 tuition or charged separately. This overview does not establish unspecified extra charges. Do not assume the $18,000 tuition total is an all-inclusive cost of attendance.

No payment is requested by this information packet. Tuition payment dates, withdrawal/refund terms and any optional payment plan must be supplied in the accepted enrollment agreement before funds are collected.

# Payment pathways & transparent enrollment

## Tuition payment arrangements

Annual payment: $4,500 per program year. Applicants may request two payments of $2,250 or twelve payments of $375, each totaling $4,500 per year. An installment arrangement becomes effective only when accepted in writing by the Academy and applicant. The agreement states due dates and any applicable charges before acceptance. These amounts do not include unspecified extra charges, and this overview is not a loan approval. Tuition is annual, not a $4,500 semester fee.

## Employer and workforce support

Applicants may ask about employer-paid tuition, reimbursement arrangements and available workforce assistance. Funding depends on eligibility, provider approval and written award or employer authorization. Neither grants nor financing are guaranteed. An application may identify interest in support without uploading financial accounts or a Social Security card.

## Tuition scope and required materials

Tuition supports scheduled RTI instruction, assessments and academic progress reporting. The accepted enrollment agreement lists core books, platform access and lab materials and states whether each is included or separately charged. Personal tools/PPE, licensing/testing fees and optional equipment are separately itemized when applicable. No extra fee is imposed solely by this overview.

## What you receive before enrollment

A written enrollment agreement identifies the legal Academy/provider, assigned cohort and instructional format, tuition and required fees, payment dates, attendance/progress rules, withdrawal and refund terms, records/transcript process and grievance contact. Applicants receive the applicable provider/program authorization information. Employment, funding and tradesman licensure follow their separate eligibility and approval processes.

## Your four-year tuition

Published tuition is $4,500 per year for four years, totaling $18,000. The accepted enrollment agreement confirms the tuition commitment for the admitted cohort and separately identifies any required non-tuition costs. Any change is handled under the signed agreement and applicable notice requirements; applicants receive complete terms before payment.
